

IN THE CLAIMS

Please amend the claims as follows:

Claim 1 (Currently Amended): An imaging apparatus, comprising:

a recording device configured to record data; and

a replaying device configured to replay the data,

~~a recording function or replaying function for moving image data or voice data, other than a recording function or replaying function for at least still image data; and~~

wherein the recording device includes a continuing mode for recording simultaneously or in a predetermined order to associate and record a plurality of data of same kind or different kind in the still image data, the moving image data or the voice data in accordance with associated information so that the plurality of data are capable of being replayed in accordance with the associated information[[,]]; and

~~said plurality of data being associated and capable of recording or replaying, in accordance with said continuing mode,~~

said continuing mode ~~having~~ has a function in which ~~an~~ the associated information for [[a]] first data ~~using the continuing mode is~~ are maintained after ~~recording of the first data are~~ recorded in the continuing mode, and if the continuing mode is selected again after second data are recorded in a mode other than the continuing mode, [[a]] third data to be newly recorded [[is]] are associated with the first data, ~~if the continuing mode is selected again, after a second data that the continuing mode is not used, is recorded.~~

Claim 2 (Original): The imaging apparatus according to claim 1,

wherein the associated plurality of data are data-processed by at least one mode of a normal still image mode, a normal moving image mode, a normal voice mode, a continuing

still image mode, a continuing moving image mode, a continuing voice mode and a replaying mode.

Claim 3 (Currently Amended): The imaging apparatus according to claim 2,
wherein said associated information ~~[[is]]~~ are held even ~~through~~ though a power
source stopping state of a low consumption power in which ~~[[the]]~~ a photograph and
replaying operation are prohibited,
wherein an associated recording function is carried out pursuant to the associated
information when the continuing mode is set again.

Claim 4 (Original): The imaging apparatus according to claim 2,
wherein a time information of a mutual time of data associated and recorded or an
individual time recorded is included in the associated information.

Claim 5 (Original): The imaging apparatus according to claim 2,
wherein a plurality of associated information are selectable in the continuing mode.

Claim 6 (Original): The imaging apparatus according to claim 2, wherein the
continuing data for the moving or voice recording are recorded in the continuing mode and
the still image is recorded.

Claim 7 (Original): The imaging apparatus according to claim 2, wherein said
associated information is recorded as an information within a file.

Claim 8 (New): The imaging apparatus according to claim 1, wherein the data are still image data.

Claim 9 (New): The imaging apparatus according to claim 8, wherein the data further include moving image data or voice data.

Claim 10 (New): The imaging apparatus according to claim 1, wherein the associated information are file names of the data.
